# Streamline your procurement and supply processes hassle-free with our AI solution

A hassle-free AI platform providing precise assistance in all your procurement and supply tasks
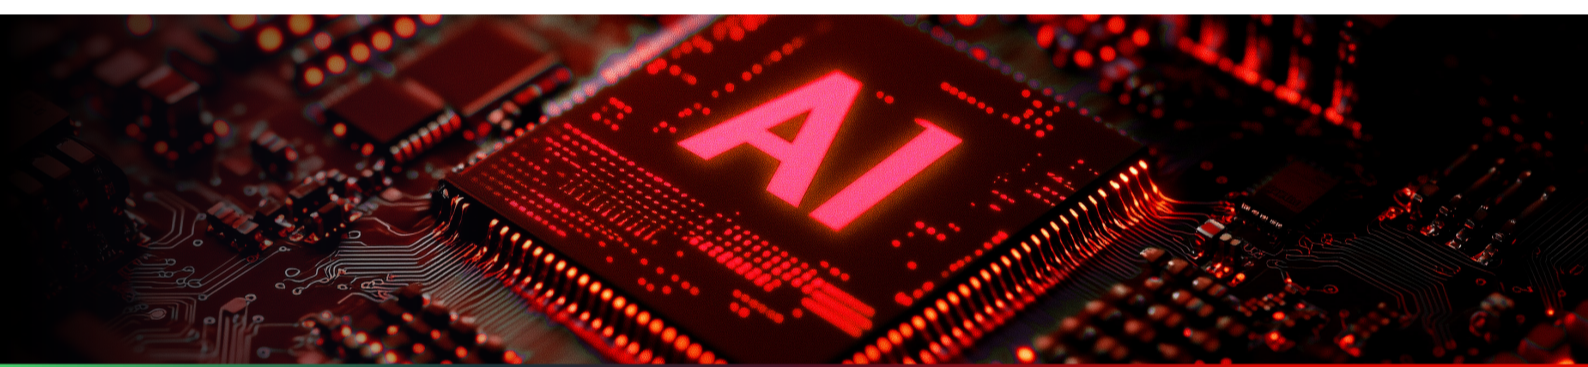

Our solution enables organisations to harness the power of AI for inclusive decision-making and to improve business outcomes. As a platform, it leverages AI-driven insights to analyse, measure and address Diversity, Equity and Inclusion (DEI) challenges within an organisation.

We provide an easy-to-use AI platform that delivers precise automated assistance for all your procurement and supply needs. It guarantees an increase in velocity by streamlining procurement processes.

Why our AI solution?

1 UAE sovereign technologies
Built and managed locally in the UAE
Complies with all UAE laws and regulations

2 Secured and hosted in the UAE
Protected and hosted in the UAE
Managed through private cloud services or on-premises installations

3 Owned AI & big data models
Created in-house to fit your unique needs
No reliance on external or third-party platforms

4 No data collection
Your data is never used to improve or train our AI systems
Complete privacy and confidentiality guaranteed

How does AI help with procurement processes?

Payments and invoices scheduling
Track and manage any financial process in synchronicity

Stay on track
Notifications on statuses, changes and risks, also delegate background jobs

Performance monitoring
Collect feedback and evaluate suppliers' performance for future improvements

RFP drafting
Receive detailed RFP drafts, highlight key points and forecast outcomes

Supplier score and selection
Automated selection process based on inputs and data enhancement with workspaces and data rooms

Contracting simplified
Leverage negotiation points with high-precision assistant

Share processes and data
Save workspace strategies to perform recurring tasks and with data in data rooms

Stay updated
Track changes, share notes and connect the calendar

Connect with ease
Monitor activities, plan and request information
